

# “Stringing a One Strand Necklace”

**Class Description:** In this class you will learn how to professionally begin and end a one strand necklace. We will begin with identifying the few tools you really need to accomplish this task and the components you must absolutely use to make your finished product look and feel “Handmade” and not “Homemade”. Then you will learn how to properly crimp and use the components discussed. You will be an expert at crimping by the time we walk into the shop to choose the beads you will use to make your creation. We will discuss design decisions at that time also. Learn about symmetry, asymmetry and the importance of balance and the use of spacer beads...and why. Finally, after you have strung your beads you will learn how to finish your necklace with a great tip to remove any ‘slack’ from your stringing.

**Date and time:** Saturday, April 23 10:00 – 1:00

**Class Fee:** \$20.00 plus your beads (Everything is 10% off the day of the class)

No tools necessary.
